I'm going to talk about the last film that I ~~have seen~~ saw ~~the~~ last week called "Closer".

"Closer" is a 2004 film directed by Mike Nichols and written by Patrick Marber. ~~This~~ The movie talks about love and relationships. It tells the relationship about of two couples in over the period of three years and how their feelings are changing change towards each other. In the story you can see how the lead actors ~~to~~ face love, cheating and sincerity. Julia Roberts and Jude Law are the strongest in of the couples, but along the film, they we will see that they can't have keep the control of all the situations and they are weaker than they think.

I recommend this film because it is very beautiful. "Closer" captured my attention from beginning to end. For me this film marks gets 7/10 because the acting and dialogue were great. Sometimes in the film there is too much dialogue and this takes you out away from the movie because some situations are a bit forced. In addition, it have has a nice music selection movie soundtrack. I really enjoy it.

Good 7.5/10
